

# California Academy of Sciences.

Post Office Box No. 2247.

San Francisco, Aug 31<sup>st</sup> 1885

Dear Doctor:

Your note enclosing Dr Kellogg's misplaced plant is just received, I suppose it to be a case of "misplaced label" and nobody is to blame probably except my own haste and (unintentional) carelessness. - Thank you kindly for Dr Wastson's missing papers.

I have snatched time to make a list of yours which <sup>we</sup> you desire, as below. We have all the P. R. R. & Government reports surveys &c., Smithsonian Contributions, Plantae Wrightianae, Thuberianae, Fudlerianae. We very much desire a copy of Plantae Lindheimerianae, - I do not even know the author.

We have a full set of Proceedings Am. Acad., but of your separate papers published therein we lack the following.

Vol I. pps. 47--50. Vol II. pps 323--325.  
Vol III pps. 127--129. Vol. IV pps. 362--366. Vol V. pps. 114--171.  
Vol VI pps. 37--80, & 519, 556. Vol VII pps. 145--200.  
Vol X. pps. 39--78, & 312--350. Vol XI pps 71--104.  
Vol XII 51--84, & 159--165 - We have no other

of yours  
octavo papers, published in other works  
~~excepting~~, excepting a revision of American  
Melanthaceae, Synopsis of *Hosackia*, & Affinities  
of Ceratophyllaceae. You kindly offered when  
you were here to send us such of your  
papers as were needed by us and you were  
able to spare. It is as you know, very  
much more convenient to have your papers  
bound together and at hand, than to wander  
around the building and wade through  
sets of Transactions.

We wish to purchase botanical works  
from time to time, and just now we want  
*Flantae Lindheimerianae* & the Botany of  
the Sulphur. If any opportunities of  
buying them come to you, we shall be glad  
to be put in communication with the  
seller.

Acanthomintha &c went to you last  
week. I shall be glad to see your *Choizanthus*

Respectfully Yours,

Mary A. Curran
